Md. Jobayer Hasan

Dhaka, Bangladesh | +880 1742-460806 | Jobayer9948@gmail.com | linkedin.com/in/md-jobayer-hasan | github.com/Jobayer-hasan-rifat

Summary

Computer Science graduate (BRAC University, September 2026) with hands-on experience building full-stack web applications using React, Node.js/Express, and Python (Flask), backed by MongoDB and MySQL. Experienced in designing REST APIs, JWT-based authentication, role-based access control, and real-time features with Socket.io, with projects deployed on Vercel. Comfortable with Git-based workflows and additional coursework experience in PHP/Laravel. Also has a research background in deep learning (CNNs, PyTorch/TensorFlow) through a completed computer vision thesis, and is currently exploring cybersecurity fundamentals.

Skills

Frontend: HTML, CSS, JavaScript (ES6+), React.js, Redux, Responsive UI Design
Backend: Node.js, Express.js, Python, Flask, PHP, Laravel, REST API Design, JWT Authentication
Databases: MongoDB, MySQL, Schema Design
Tools & Platforms: Git/GitHub, Vercel, Netlify, Socket.io, Postman, VS Code, Linux
AI & Machine Learning: TensorFlow, PyTorch, OpenCV, Scikit-Learn, CNNs

Projects

BRACU Eureka | *React, Flask, MongoDB, Socket.io* Live Demo | Repo

- Built a full-stack campus platform for BRAC University combining lost & found, a peer-to-peer marketplace, and ride/bus booking, with JWT-secured REST APIs across all modules.
- Implemented real-time messaging with Socket.io and a responsive React frontend; deployed on Vercel with MongoDB for persistent storage.

KajLagbe – Job Marketplace Platform | *MongoDB, Express, React, Node.js* Live Demo | Repo

- Built a full-stack service marketplace (MERN, MVC architecture) connecting clients with local service providers, with JWT authentication and role-based access for Seekers, Providers, and Admins.
- Implemented category, location, price, and rating-based search/filtering with a secured REST API using bcrypt password hashing, Helmet, and input validation.

Education

BRAC University September 2026
Bachelor of Science in Computer Science *Dhaka, Bangladesh*

- Thesis: *Automated Visual Inspection for Industrial Environments* – developed CNN-based deep learning models (PyTorch/TensorFlow) for real-time defect detection and anomaly identification in manufacturing quality control.
- Relevant coursework: Web Technologies, Software Engineering, Database Systems, Algorithms, Artificial Intelligence, Machine Learning.
